

Using Creative Curriculum.net

Di-Ann Ethier is the Education Coordinator at Webster Square Day Care Center, Inc.

In this half day workshop she will share with you how Webster Square is successfully utilizing this exciting piece of technology.

This workshop will teach you all you need to know to successfully navigate the web based program that accompanies the Creative Curriculum Development Continuum. We will start at the beginning (from adding a teacher/class/child) to producing a professional child progress report for your next Parent/Teacher conference.

Whether you are new to this program or you believe that you are spending far too much time on the computer trying to use it, this workshop will give you helpful tips and shortcuts for logging in observations, intentional curriculum planning, linking Creative Curriculum activities to Preschool Learning Experiences, and much more.

This is an afternoon session only.
